Course Description

This is a graduate level course in U.S. energy and environmental policy. We will focus on several key topics: (a) an overview of energy and environmental policymaking in the United States; (b) an overview of energy resources worldwide and in the United States; (c) the use of fossil fuels — oil and gasoline, coal, and natural gas; (d) the use of non-fossil sources of energy and renewable energy sources — nuclear power, solar, wind, biomass, hydropower and others; (e) energy, the environment, and climate change; (f) reducing the demand for energy and protecting the environment through conservation and efficiencies; (g) an analysis of recent energy and environmental legislation and regulation; and finally (h) the future of U.S. energy and environmental policymaking.

The Learning Objectives for this Course

By the end of this course, you will be able to:

(a) Demonstrate an understanding of U.S. domestic energy and environmental policy and related scientific, technological and political issues.
(b) Describe how energy needs are met in critical areas of U.S. life, from transportation through transmission of electricity.
(c) Explain the major legislative, regulatory and policy initiatives in the area of energy and the environment.
(d) Convey your understanding of energy and environmental terms, concepts, issues and
Our Virtual Classroom

Live online class sessions will be conducted on Zoom at our regularly scheduled class time (Thursdays from 6:00 – 8:00 p.m., Eastern Standard Time). You can access the class by using the “Zoom Meetings Link” in the content area of our Blackboard page. These class sessions will be a combination of lecture and discussion (including small breakout groups). It is essential that you have read the assigned material and have a grasp of the week’s significant news related to Congress so that you are engaged and ready to participate actively in class. To facilitate our discussions and interaction, I strongly encourage you to activate your computer video camera during class. You can address any privacy concerns by utilizing Zoom’s “virtual background” feature.

Weekly Asynchronous Current Event Activity/Discussion

In addition to our synchronous (live online) classes, each week there will be an asynchronous “current events” activity to supplement our regular live class sessions. Each week, in addition to your assigned readings, you will identify a current events issue in federal energy and environmental policy. You should be prepared to discuss it with me and your classmates at our next live session. The assignment includes emailing me (before midnight each Wednesday) a short summary of the issue, an explanation of why you think it is significant, and a description of the material you’ve reviewed (e.g., a newspaper or periodical article, a newscast, a podcast) related to it. This is intended to be a short project and you should only devote about an hour of your time each week to it. Examples of a relevant energy or environmental current event include an executive order or proposed regulation issued by President Biden or an executive agency, a congressional committee hearing of one of the many committees of jurisdiction in energy and environmental policy, the introduction of a significant piece of legislation by a member of Congress, an important federal court case, or some action or position taken by private industry or state governments in response to federal government policy.

How Your Grade Will be Determined

Class Attendance, Participation and Oral Presentation: Students are expected to attend class each week and participate actively in class discussions throughout the semester. You’ll be asked on occasion to present your asynchronous current events issue to the full class in addition to breakout groups. Each student will give a 15-minute presentation of his or her research findings and advocacy in breakout groups during our last class session. Together this will count as 20 percent of your final grade.

Research Paper: You will write a 10 to 12-page research paper (2500 to 3000 words, 12 pt font, double-spaced, not counting footnotes, bibliography, charts and figures) on a contemporary energy or environmental policy issue. In this paper, you will (a) summarize the current state of the federal policy in this field; (b) advocate for federal policy changes that you think are desirable in this field; and (c) describe relevant policy actors and institutions in the federal executive and legislative branches who would be most responsible for making such changes, and list and briefly describe the interest groups that would be most likely to support them.

You must submit your research paper topic and short outline to me no later than March 14. The paper will be due April 13 and will constitute 40 percent of your course grade. Unexcused late submission of your paper will result in a reduction of your grade.
**Final Examination**: The final examination will be a take-home, open-book, open-note examination. You will be asked two broad questions (you will pick two from three options) related to energy and environmental policy and your answers will be based on the reading, lectures and discussions that we have done during the semester. This will count as 40 percent of your final grade.

Following is the grade scale for all GSPM classes:

<table>
<thead>
<tr>
<th>Grade*</th>
<th>Grading Standard</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>94-100</td>
</tr>
<tr>
<td></td>
<td>Your work is outstanding and ready for submission in a professional environment. Your material, effort, research, and writing demonstrate superior work.</td>
</tr>
<tr>
<td>Grade</td>
<td>Score Range</td>
</tr>
<tr>
<td>-------</td>
<td>-------------</td>
</tr>
<tr>
<td>A-</td>
<td>90-93</td>
</tr>
<tr>
<td>B+</td>
<td>87-89</td>
</tr>
<tr>
<td>B</td>
<td>83-86</td>
</tr>
<tr>
<td>B-</td>
<td>80-82</td>
</tr>
<tr>
<td>C+</td>
<td>77-79</td>
</tr>
<tr>
<td>C</td>
<td>73-76</td>
</tr>
<tr>
<td>C−</td>
<td>70-72 (lowest grade to pass)</td>
</tr>
<tr>
<td>F</td>
<td>Below 70</td>
</tr>
</tbody>
</table>

*Please note that you may be penalized for late submission of assignment(s).*

**Suggested Sources and Online Readings:**

Suggested sources for current energy policy news:

RealClear Energy, Politico, The Hill:
[http://www.realclearenergy.org](http://www.realclearenergy.org)
[http://www.politico.com/tipsheets/morning-energy](http://www.politico.com/tipsheets/morning-energy)

Blackboard Site

A Blackboard course site has been set up for this course. Each student is expected to check the site throughout the semester, as Blackboard will be the primary venue for outside classroom communications between the instructors and the students. Students can access the course site at https://blackboard.gwu.edu. Support for Blackboard is available at 202-994-4948 or helpdesk.gwu.edu.

Academic Integrity:

All members of the university community are expected to exhibit honesty and competence in their academic work. Students have a special responsibility to acquaint themselves with, and make use of, all proper procedures for doing research, writing papers, and taking exams. Members of the community will be presumed to be familiar with the proper academic procedures and will be held responsible for applying them. Deliberate failure to act in accordance with such procedures will be considered academic dishonesty. Academic dishonesty is defined as “cheating of any kind, including misrepresenting one’s own work, taking credit for the work of others without crediting them and without appropriate authorization, and the fabrication of information.” Acts of academic dishonesty are a legal, moral, and intellectual offense against the community and will be prosecuted through the proper university channels. The University Code of Academic Integrity can be found at http://studentconduct.gwu.edu/code-academic-integrity.

In the Legislative Affairs program, we enforce a zero tolerance policy for plagiarism. If there is evidence that you plagiarized your research assignment, you will be given an “F” for the assignment and an “F” for the course. That also means you’ll probably be kicked out of our master’s program. To guard against plagiarism, we use SafeAssign, a feature found in Blackboard. All papers must be submitted to this site. More on this when we get closer to our research assignment.

Copyright Statement:

Unless explicitly allowed by the instructor, course materials, class discussions, and examinations are created for and expected to be used by class participants only. The recording and rebroadcasting of such material, by any means, is forbidden.
The Copyright Act (17 U.S.C. § 10) governs the rights attributed to owners of copyrighted work. Under certain circumstances, educational institutions may provide copies of copyrighted works to students. The copies may not be copied nor used for any other purpose besides private study, scholarship, or research. Users should not provide electronic copies of any materials provided on this course’s Blackboard site to unauthorized users. If a user fails to comply with Fair Use restrictions, he/she may be held liable for copyright infringement. No further transmission or electronic distribution is permitted.

**Use of Electronic Course Materials and Class Recordings:**

Students are encouraged to use electronic course materials, including recorded class sessions, for private personal use in connection with their academic program of study. Electronic course materials and recorded class sessions should not be shared or used for non-course related purposes unless express permission has been granted by the instructor. Students who impermissibly share any electronic course materials are subject to discipline under the Student Code of Conduct. Please contact the instructor if you have questions regarding what constitutes permissible or impermissible use of electronic course materials and/or recorded class sessions. Please contact Disability Support Services if you need additional accommodations for accessing electronic course materials.

**Support for Students with Disabilities:**

GW’s Disability Support Services (DSS) provides and coordinates accommodations and other services for students with a wide variety of disabilities, as well as those temporarily disabled by injury or illness. Accommodations are available through DSS to facilitate academic access for students with disabilities. Please notify your instructor if you require accommodations. Additional information is available at [http://disabilitysupport.gwu.edu/](http://disabilitysupport.gwu.edu/).

**In the Event of an Emergency or Crisis during Class**

If we experience some an emergency during class time, we will try to stay at this location until we hear that we can move about safely. If we have to leave here, we will meet at [fill in proximate location] in order to account for everyone and to make certain that everyone is safe. Please refer to Campus Advisories for the latest information on the University’s operating status: [http://www.campusadvisories.gwu.edu/](http://www.campusadvisories.gwu.edu/).

**Out of Class/Independent Learning Expectation**

Over the course of the semester, students will spend at least 2 hours (100 minutes) per week in class. Required reading for the class meetings and written response papers or projects are expected to take up, on average, 7 hours (350 minutes) per week. Over the course of the semester, students will spend 25 hours instructional time and 87.5 hours preparing for class.
Course Evaluation

At the end of the semester, students will be given the opportunity to evaluate the course through GW’s online course evaluation system. It is very important that you take the time to complete an evaluation. Students are also encouraged to provide feedback throughout the course of the semester by contacting any/all of the following:

Dr. Casey Burgat

COURSE CALENDAR
(The instructor reserves the right to alter course content and/or adjust the pace to accommodate class progress. Students are responsible for keeping up with all adjustments to the course calendar.)

February 4

Week 1: Introduction and Energy & Environmental Basics

Class Overview
Discuss Syllabus and Class Requirements and Expectations
Personal Introductions
Energy and Environmental Basics – lecture and discussion

Readings:
Yergin, *The Quest*, Introduction and Prologue
Rosenbaum, Chap. 1, “After Earth Day”, pp. 1-13
Remarks by President Biden announcing energy and environmental executive actions (1/27/21) [link]
**February 11**

Week 2: An Overview of U.S. Energy & Environmental Policymaking Institutions

- Executive Branch: Key Cabinet Agencies and Independent Regulatory Agencies, White House and OMB
- Congress: Committees of jurisdiction and key members
- Role of the courts
- Role of states and local governments

**Readings:**

- Rosenbaum, Chap. 3, “Making Policy: Governmental Institutions and Politics”
- Opening Statement of Energy Secretary Nominee Jennifer Granholm, Senate Energy and Natural Resources Committee (1/27/21) [link]

*Asynchronous Current Event Issue (due Feb. 10)*

**February 18**

Week 3: Overview, Policy Context and Outlook

- World and U.S. energy resources – basics, trends and outlook
- Energy and Environmental Policy Context – From Scarcity to Abundance, Volatility in the Marketplace, Comparing Presidencies

**Readings:**

- IEA *World Energy Outlook - Overview* (2020)
- CRS, 21st Century U.S. Energy Sources: A Primer (2017) (Summary and Introduction – through p. 3) [link]

*Asynchronous Current Event Issue (due Feb. 17)*

**February 25**

Week 4: Fossil Fuels: Oil, Coal & Natural Gas

- Basics, trends and outlook
- Unconventional methods impact on oil production
- Geopolitics
- “Fracking” and other environmental issues
U.S. policy affecting fossil fuels

Readings:

Yergin, The Quest, chapters 11-14
Rosenbaum, Chap. 8, pp. 230 - 247

Asynchronous Current Event Issue (due Feb. 24)

Guest Speaker: Chris Smith, former Assistant Secretary for Fossil Energy at the Department of Energy

March 4

Week 5: Nuclear Power

Basics, History
Nuclear power generation in United States
Issues: Safety, Environmental, and Proliferation
Nuclear Waste Policy

Readings:

Yergin, The Quest, chapter 18 and chapter 20 (pp. 407-418)
Rosenbaum, Chap. 8, pp. 247-255
Aspen Institute, The Future of Nuclear Energy in the United States (2017), pp. 3-9 (Executive Summary and Status of Existing Nuclear Power Plants) link

Asynchronous Current Event Issue (due March 3)

Guest Speaker: Chris Hanson, Commissioner of the U.S. Nuclear Regulatory Commission, former Senior Advisor in DOE’s Office of Nuclear Energy, Senate Energy and Water Appropriations Subcommittee staffer

March 11

Week 6: Solar, Wind, and other Renewables

Basics, Trends and Outlook
Economics of renewables
Federal and state incentives and regulation

Readings:

Yergin, The Quest, chapters 27-30
Rosenbaum, Chap. 8, pp. 255-260

Asynchronous Current Event Issue (due March 10)

Research Paper Outline Due March 14
March 18 – Spring Break

March 25

Week 7: Electricity Generation and the Utility Industry

The modern electric grid
Challenges for electric utilities; distributed generation
Grid resiliency and cyber security
Environmental regulation of the utility industry

Readings:
Yergin, *The Quest*, chapters 17, 19, 20

Asynchronous Current Event Issue (due March 24)

Guest Speaker: Tom Craig, Director of Federal Government Affairs, Duke Energy, and former majority clerk for Senate Energy and Water Appropriations Subcommittee

April 1

Week 8: Energy, the Environment and Climate Change

US Policy Issues
Paris Climate Agreement

Readings:
Yergin, *The Quest*, chapters 23-26
Rosenbaum, Chap. 10, “The Politics and Policy of Global Climate Change”

Asynchronous Current Event Issue (due March 31)

April 8

Week 9: The Future of Energy & Environmental Policy

The Biden Administration and energy and environmental policy
Pending and Potential Court Cases
International Issues

Readings:
Yergin, *The Quest*, chaps. 33-35 & Conclusion
Other Readings TBD

Asynchronous Current Event Issue (due April 7)

April 15
Week 10: Review, Research Paper Presentations

Research Papers Due April 13
Oral presentations of Research Papers and discussions in Breakout Groups
Exam Review
Final Exam Take Home Given Out

Copyright Statement

Unless explicitly allowed by the instructor, course materials, class discussions, and examinations are created for and expected to be used by class participants only. The recording and rebroadcasting of such material, by any means, is forbidden.
